Scope, type, rule based

Assessment Model

- 1. The Humanising Pedagogy provides the theoretical underpinning for the structure, sequence, process and choices followed by the adaptive engine.
- 2. Engagement replaces pedagogy as a model within the proposed adaptive engine, in order to;
- a) Align the whole ALS system to humanising pedagogic views and
- b) Prioritise engagement as a prerequisite to the learning process

Humanising Adaptive Learning Engine (HALE) Structure

Humanising Adaptive Learning Engine (HALE) Features

- Courses and activities
- Users
- Course enrolment
- User functionality
- A bit more about
- JavaScript library
- Upgrading
- Logs and statistics

Humanising Adaptive Learning Engine (HALE) Technology Stack

Backend

- PHP
- Python

Frontend

- React.js
- HTML/CSS
